Education

Kalinga Institute Of Industrial Technology

Bachelor of Science in Computer Science

Aug. 2024 – Presnet

Bhubaneswar, Odisha

Relevant Coursework

- Data Structures
- Algorithms Analysis
- Artificial Intelligence
- Systems Programming
- Software Methodology
- Database Management
- Internet Technology
- Computer Architecture

Experience

- None as of now

Projects

Smart Subscription Tracker | React, CSS, Javascript, Node.js, Mongo DB

February 2026

- Built a full-stack MERN application to manage recurring subscriptions, featuring secure user authentication and real-time database state management.
- Integrated a clean dashboard UI using React and CSS to track payment cycles and notify users of upcoming renewals.
- Optimized backend performance by structuring MongoDB schemas for efficient data retrieval and scalable user growth.

Ai based Methane Gas Forecasting System | Python, Matplotlib, LSTMs, Transformers, MERN

March 2026

- **Architected a hybrid Deep Learning model** utilizing **LSTMs and Transformers** to predict methane concentration levels, achieving high accuracy in forecasting potential leakages from multi-variate time-series sensor data.
- **Engineered an end-to-end MLOps pipeline** with **TensorFlow** for model training and **FastAPI** to serve real-time inference, ensuring sub-second response times for critical safety alerts.
- **Developed a comprehensive monitoring dashboard** using the **MERN stack** and **Matplotlib**, enabling stakeholders to visualize historical trends and receive automated push notifications for predicted anomalies.

Plant Infection Detector | Python, Tensorflow, Deep learning, CNNs

March 2026

- Designed a Convolutional Neural Network (CNN) to identify plant diseases from leaf images, aimed at assisting in early-stage agricultural intervention.
- Pre-processed large-scale image datasets using TensorFlow's data pipelines for efficient training and model validation.
- Leveraged Deep Learning foundations to experiment with architectural layers, improving the model's ability to generalize across different plant species.

Technical Skills

Languages: Python, Java, C, HTML/CSS, JavaScript, C++

Developer Tools: VS Code, Google Colab, Google Cloud Platform, RAG, MCP

Technologies/Frameworks: GitHub, MERN Stack, TensorFlow, Scikit-learn, Matplotlib, Fast API, Rest API

E-Labs | KIIT University | Bhubaneswar, India

Senior Member

2025 – Present

Sandrover Project (Kshitij, IIT Kharagpur): Led Team TRRAP in designing a 4WD rover; custom-calibrated a dual-ESC powertrain and reached the national finals.

- **IOTRONIX MVP:** Named "Most Valuable Player" for demonstrating technical excellence in hardware-software integration during the 2025 E-Labs flagship event.
- **Joffe 3.0 Star Performer:** Recognized as the top performer among peers for proficiency in Java, Data Structures, and industry-standard coding practices.
